“I enjoy drawing from my 25 years’ experience in privacy, security, and information technology to help clients find creative solutions. I am passionate about the intersection between technology and the law, the fast-paced nature of this industry, and how to support my clients’ success.”

David Rice has more than 25 years of experience representing clients on data privacy and security issues, data breaches, technology transactions, and cloud services and infrastructure. He advises clients on privacy compliance, handles incident response, conducts employee cybersecurity training, and formulates responses to data subject requests.

David has negotiated hundreds of complex information technology contracts, including agreements involving cloud services, data and marketing, data centers, networking, the General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA), databases, colocation, SaaS, IoT, content delivery networks, dark fiber, IP transit, communications services and equipment, wireless networks, equipment leases, device trials, the Health Insurance Portability and Accountability Act (HIPAA), the Family Educational Rights and Privacy Act (FERPA) and spectrum leases.

David’s clients include Fortune 100 and international companies in highly-regulated sectors, including internet & telecommunications, software & cloud services, social media, gaming, as well as government and educational institutions. David is known for his national and international experience, helping to close transactions for services in the United States and 35 other countries in North America, South America, Africa, Europe, and Asia.

A leader in the field, David regularly speaks at conferences, trade organizations, and in-house for companies on emerging issues related to data security and privacy.
